

HOW TO TALK TO @BOTFATHER

Create new bot

BotFather is in charge of new bots creation. Launch Telegram and ping @BotFather.

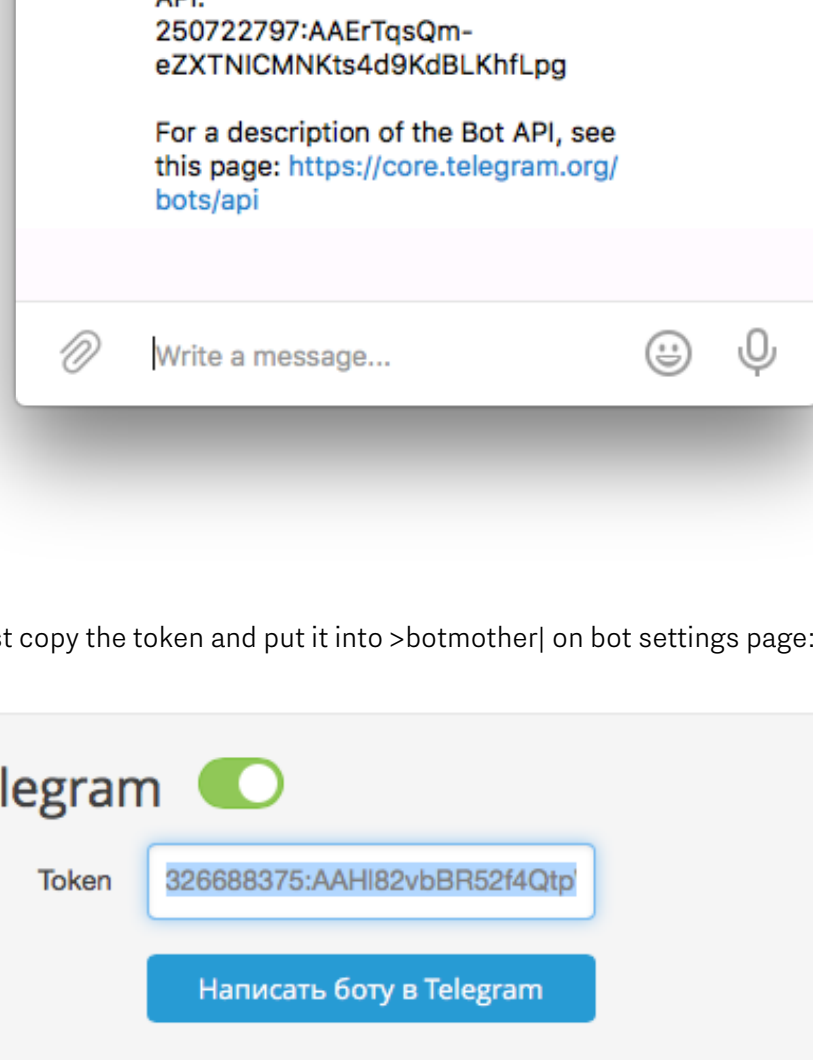

Send /newbot and set a bot's name

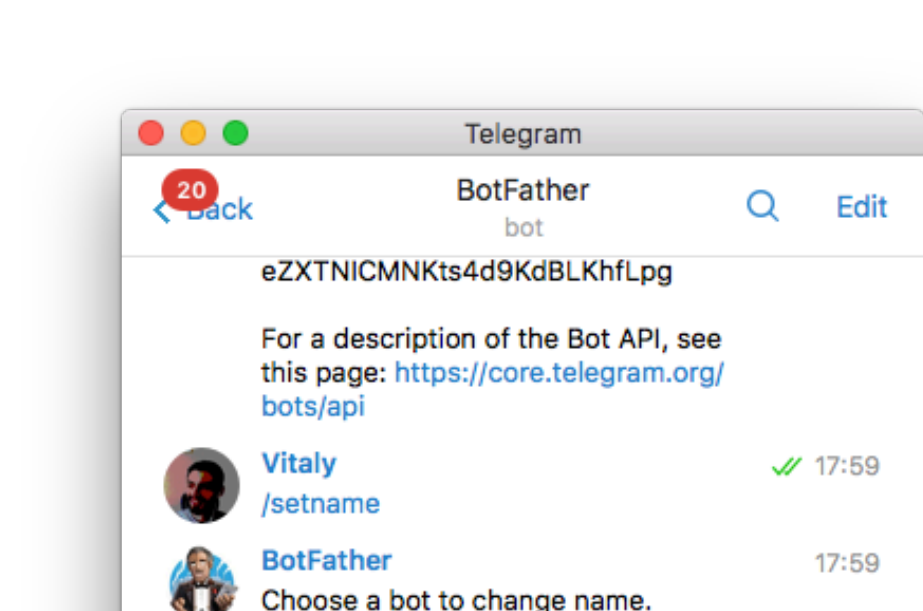

Then send username (or botname). Username should end with "bot" or "_bot".

Right	Wrong
examplebot	botexample
example_bot	example

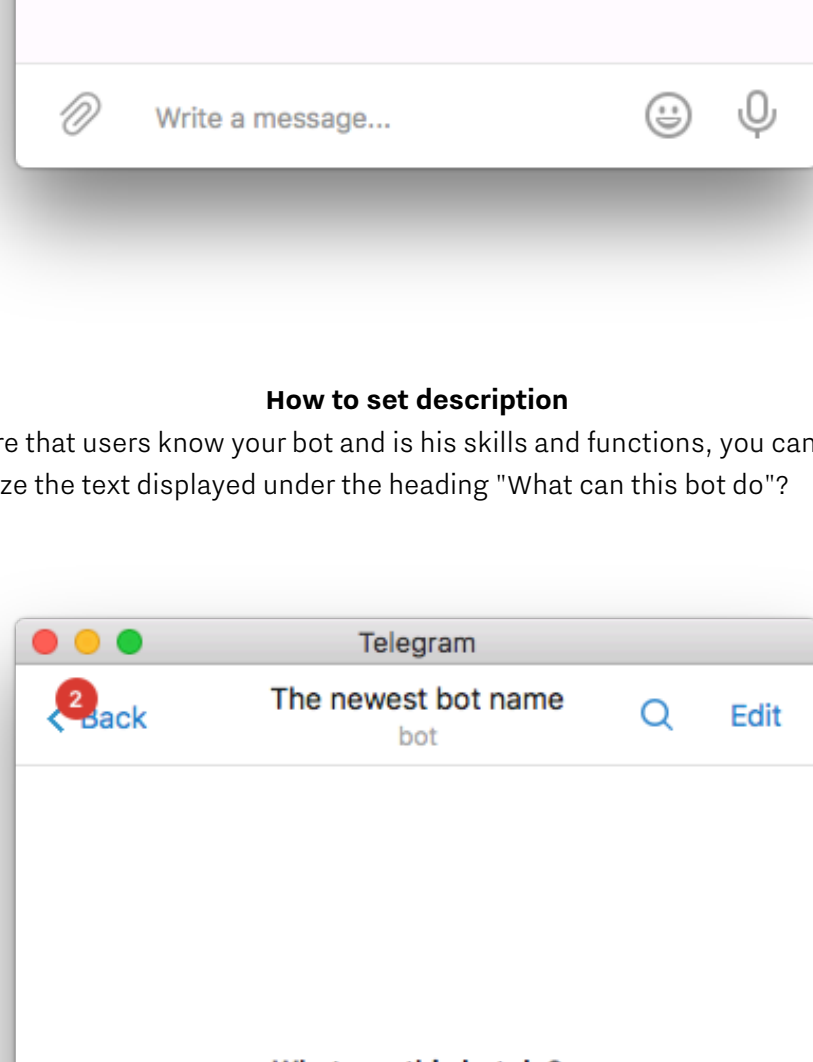

Then just copy the token and put it into >botmother| on bot settings page:

Edit

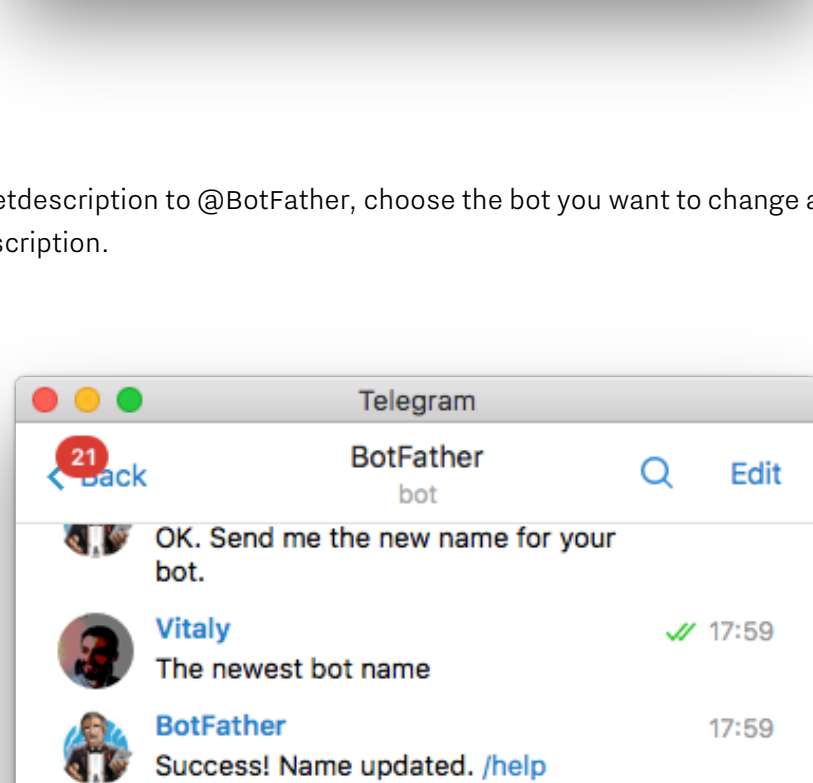

How to change the name

Send /setname to @BotFather and choose the bot you want to change.

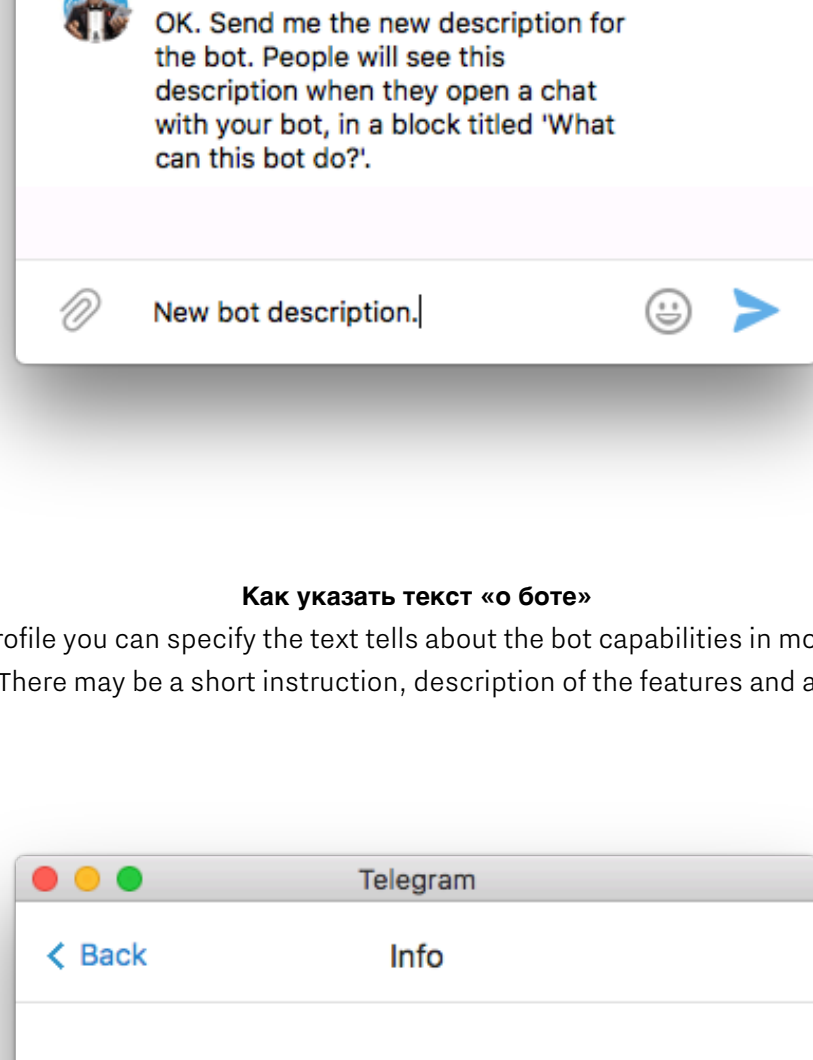

How to set description

To ensure that users know your bot and its skills and functions, you can customize the text displayed under the heading "What can this bot do?"

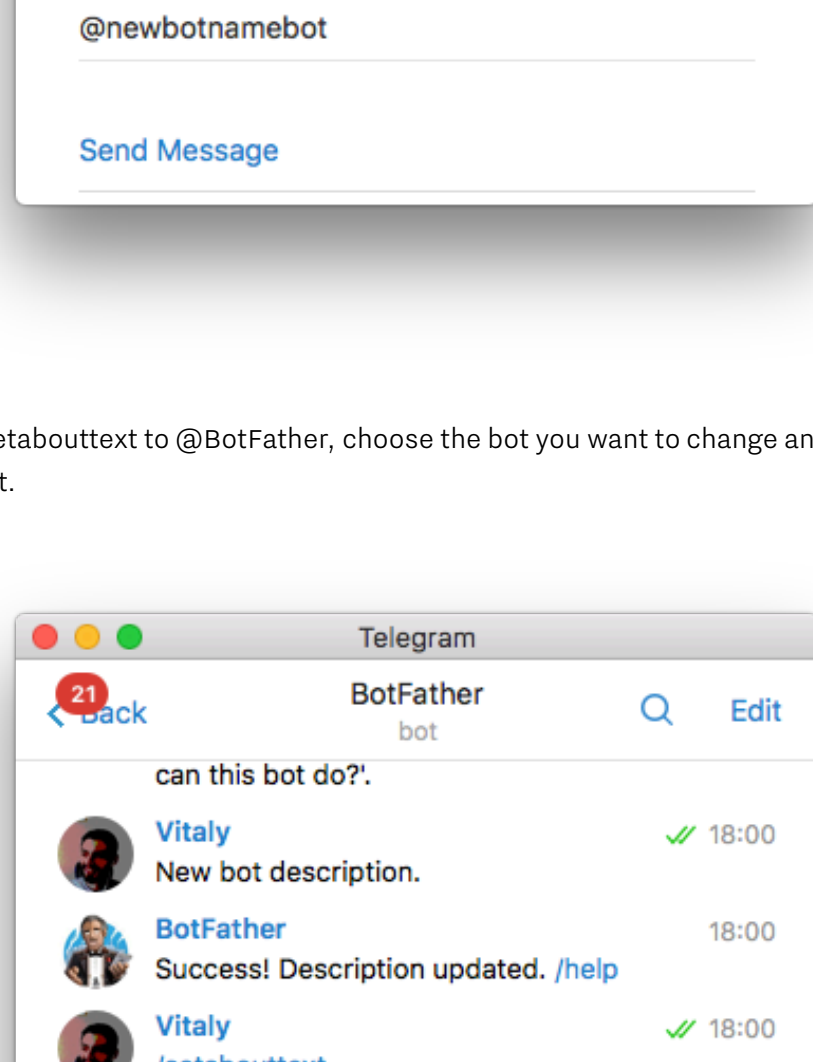

Send /setabouttext to @BotFather, choose the bot you want to change and send your text.

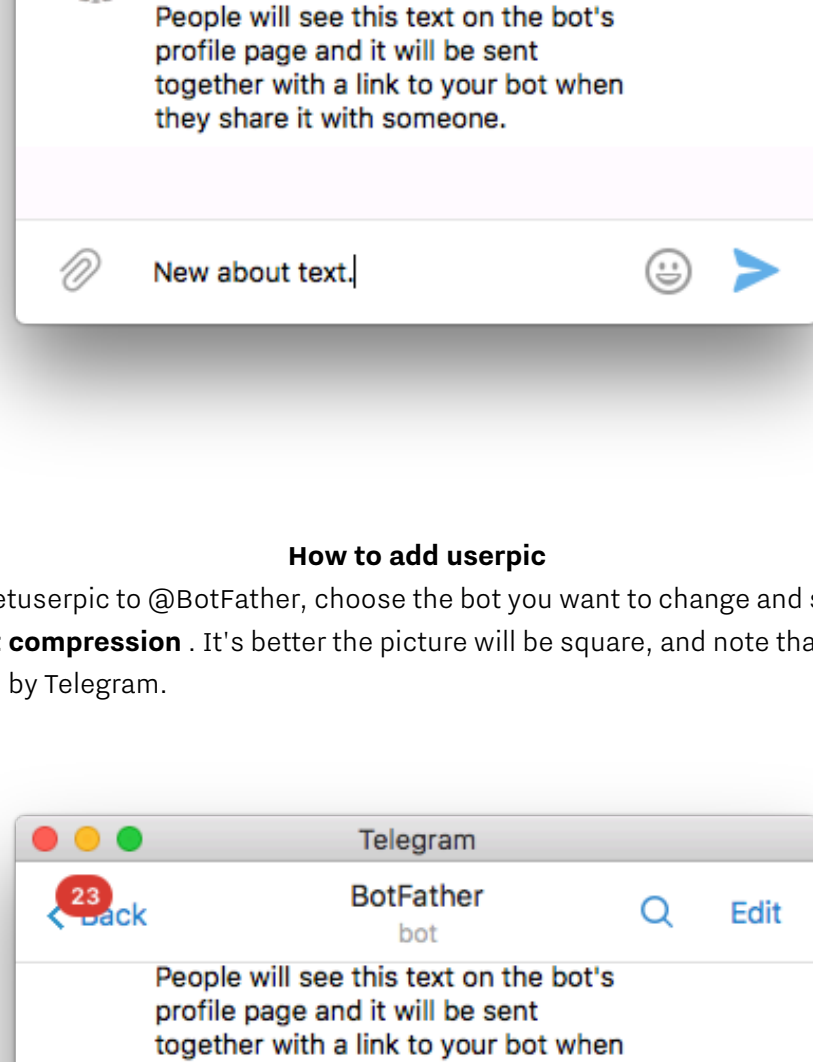

Как указать текст «о боте»

In bot profile you can specify the text tells about the bot capabilities in more details. There may be a short instruction, description of the features and anything else.

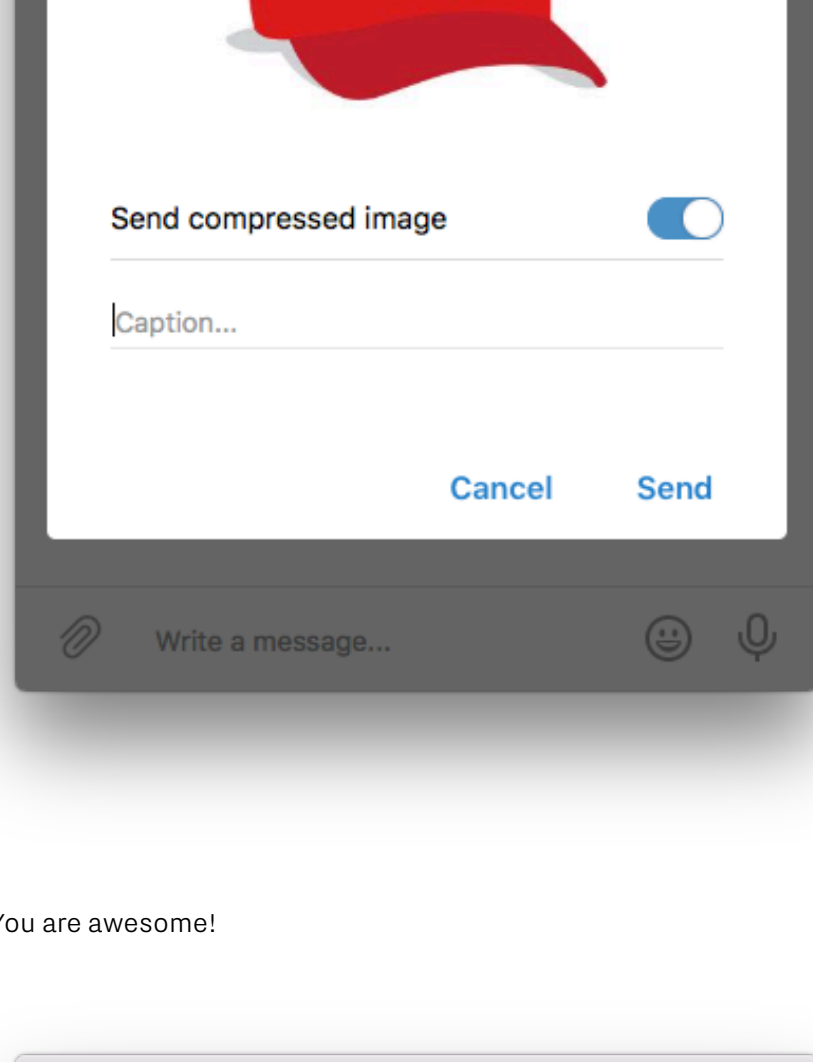

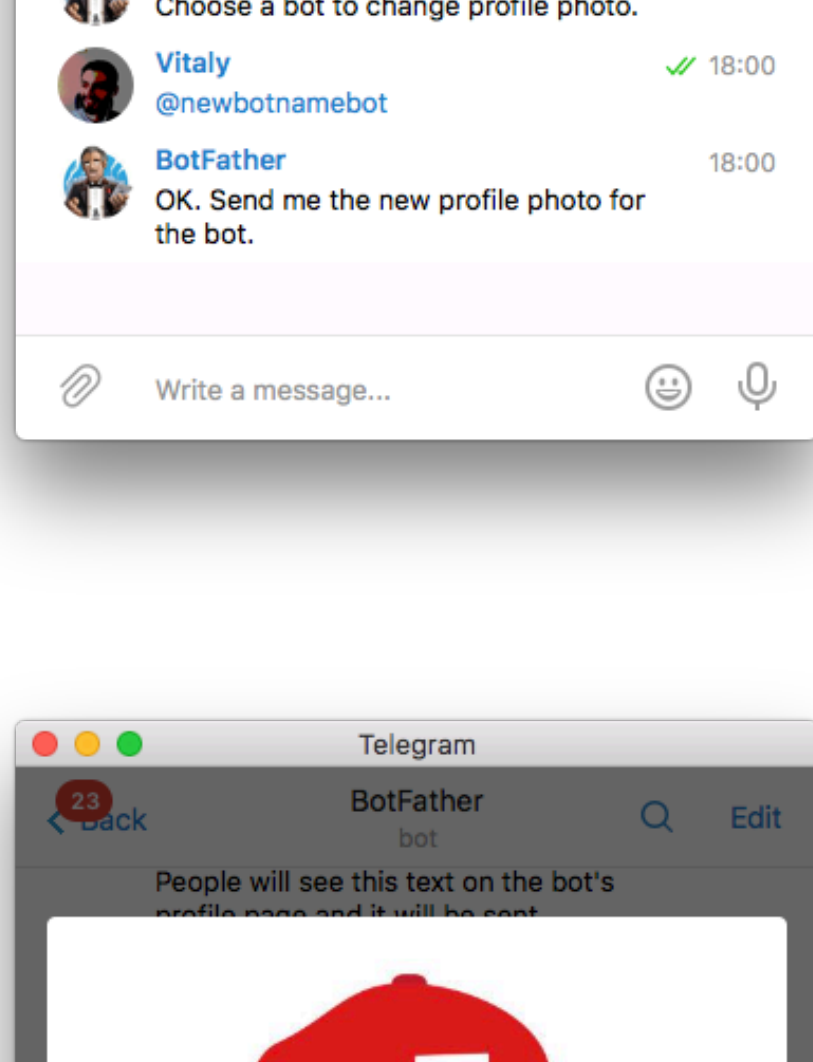

Send /setabouttext to @BotFather, choose the bot you want to change and send your text.

How to add userpic

Send /setuserpic to @BotFather, choose the bot you want to change and send a picture **without compression**. It's better the image will be square, and note that it will be rounded by Telegram.

Ready. You are awesome!
